

JOHN FRANCIS VECINA

Frontend Developer

0993-857-4301 | <https://johnvecina.vercel.app/> | 153 I. Marcelo St. Valenzuela

PROFILE

I develop responsive web applications using React and Tailwind CSS, with a focus on maintainable code and clean UI. While focused on frontend, I have practical experience with Java and MySQL for backend logic. I am currently seeking an internship to contribute to professional projects and grow my skills in a production environment.

EDUCATION

Pamantasan ng
Lungsod ng
Valenzuela
2024-Present

Bachelor of Science in Information Technology

Applying IT coursework to projects using React and MySQL. Focused on building responsive interfaces and strengthening core development fundamentals.

Malinta NHS
2022-2024

Science, Technology, Engineering and Mathematics

Focused on foundational engineering and logic. Developed strong analytical skills through technical research and mathematics coursework.

PROJECTS

December 2025

Java Student Manager

Created a backend-focused management system using Java and MySQL. Designed the database schema and implemented full CRUD functionality to handle student records efficiently.

March 2026

CineScene

Built a movie discovery platform using React and the OMDb API. Managed all aspects of development, from UI design in Tailwind CSS to API integration and state management.

April 2026

The Daily Plate

Developed a recipe application with React. Implemented local storage for user favorites and integrated TheMealDB API to fetch dynamic meal data.
